

Let Customers Pay the Way They Want by Certifying for Contactless and Mobile Payments

Today, more and more consumers around the world are making in-store purchases with contactless-enabled cards, digital wallets, and wearables. These consumers expect to pay the way they want—and will seek out merchants that allow them to use their preferred payment method. Certifying point-of-sale (POS) systems with Contactless D-PAS—the Discover® EMV®-compliant payment solution for contactless payments—may go a long way toward satisfying shoppers and capturing sales.

Accepting contactless payments is smart business

By 2029, it's predicted there will be:

15.5B

contactless payment methods, including cards, mobile wallets, and wearables worldwide¹

1.9B

NFC enabled mobile devices using contactless payments worldwide¹

57.1B

in transaction volume for contactless mobile retail payments worldwide, representing a growth rate of 98.3% from 2024¹

\$1.64T

in transaction value for NFC mobile retail payments¹

Accepting Discover is even smarter business

Discover® Network processes billions of transactions annually across 190+ countries and territories², so including Discover in POS upgrades and installations is a key step to avoiding lost sales. The numbers back this up.

of consumers in the U.S. strongly agree that ability to use a preferred payment method is the top factor that would influence their likelihood of completing a purchase with a business³

of consumers blame the business when their payment method is not accepted⁴

of merchants blame the payment network if a customer cannot complete a purchase in store due to an error message or a terminal not accepting their card³

Accept Discover and open the door to global markets

Discover Network and our partners—Diners Club International® and PULSE®—collectively process millions of transactions daily and facilitate billions in volume annually. By certifying your terminals for Contactless D-PAS, you can support a global network of alliance partners that enable contactless payments (if the issuer supports this functionality) from a range of market-leading brands—including BC Global, Elo, RuPay, and Troy. Plus, partnerships with JCB and UnionPay may allow card acceptance of the entire network in key markets like Japan and China.
